

## Installation instructions for ATP Centre Fitting Billet Battery Tray & 9LTR Tank

1. Remove the OEM petrol tank and OEM battery tray, rubber tank retainer and Single OEM Petrol Tank strap bracket (the one inline with rubber retainer).

2. Place new battery tray into position using inner 2 original battery tray fixing points. Make sure all holes are clear of debris before tightening bolts supplied. You have been supplied 2 longer and 1 shorter bolt, the shorter bolt is for the side of the tray with only one fixing hole.

3. Remove flat rubber support from right hand side (carb side). Place tank in position, place rubber in position to support the new tank, glue this in place. Then re fit tank, use original shorter tank strap 1<sup>st</sup>, hook into front clip, lead over tank and clip into centre hook on battery tray.

4. Use second strap and clip horizontally as in picture or into the groove on the tank. The second strap is slightly too long so you will need to tie a knot in this strap. Both straps must be used. Once into position, place original rubber retainer between tank and tray. Place a small piece of H/Turf between your Waterbox and new tank to prevent any rubbing.

5- Use rubber from inside original battery tray cut down and fit into base of your new tray. Place battery in tray and use original straps
